Toshiba DAISEIKAI 10 Helps Bring Sustainability and Natural Beauty to Homes in Europe

Rueil-Malmaison, June 2023 – Carrier RLC Europe is unveiling its Toshiba-branded DAISEIKAI™ 10, bringing new levels of sustainability, sleek design and performance to home comfort across Europe. Carrier RLC Europe is a part of Carrier Global Corporation (NYSE: CARR), global leader in intelligent climate and energy solutions.

First available in Nordic countries, Carrier RLC Europe is now introducing a version of its Toshiba-branded DAISEIKAI10 to suit average and warm climate conditions across Europe.

The new aesthetic of the DAISEIKAI derives from its material concept – “Go back to the Earth.” Its natural wood grille, sourced from PEFC-certified sustainable forests, makes the product unique in the air conditioning and heat pump market. Every natural wood grille with its own grain, texture and colour tone makes the DAISEIKAI 10 bespoke to each home, while a timeless white panel is also available for homeowners replacing existing air conditioners. Furthermore, recycled materials make up 43% of DAISEIKAI 10’s plastic components.

In addition to its best-in-class A+++ energy rating in cooling and heating, and ultra-quiet indoor unit operation, the DAISEIKAI 10 boasts several intelligent features to elevate homeowners’ lifestyle, such as multiple controller solutions including a luxury remote control, Wi-Fi/app, and smart speaker voice control, motion tracking

function and plasma ionizer complete with an ultra-pure filter PM 2.5 and a coated coil.

Toshiba DAISEIKAI 10 is the ideal choice for environmentally conscious homeowners who want to help preserve the planet for future generations. For more information, visit www.toshiba-airconditioning.eu.
